Color-screen Expansion Module ZIP 450M

Quick Start Guide

Package Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

Color-screen
Expansion Module

Stand

Connecting
Bracket

USB Cable

Screwdriver

Screw

Quick Start Guide

Connecting to the Phone

1. Connect the ZIP 450M and the phone using the supplied screw and connecting bracket, as shown below:

If fitted, remove the rubber cover on the phone when connecting expansion module.

Connecting two Expansion Modules

2. Follow the same step to connect a second expansion module:

The slots have a rubber cover fitted. Pull out the rubber cover when cascading expansion modules.

Your phone and the two expansion modules are connected as shown below:

Note: The ZIP 49G IP phone supports a maximum of 3 expansion modules. If more than one expansion module is connected, an additional ZULTYS power adapter (5V/2A) must be connected to any one of the expansion modules. The power adapter is purchased separately.

Connecting the USB Cable

3. Connect the USB jack of the IP phone and the mini USB jack of the first module using the USB cable. If you want to connect another module, connect the USB jack of the first module and the mini USB jack of the second module using the supplied USB cable.

As shown below:

Connecting USB Cable

Note: A compatible USB headset may be connected to the USB jack of the last module.

Assembling the ZIP 450M

Once assembly is complete, attach the Ethernet cable, power adapter (if required) and handset to begin using the IP phone.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

ISED Canada Statement

This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

Ce produit répond à la innovation, des sciences et de Développement économique Canada spécifications techniques applicables.

About Zultys

Zultys is the global provider of a true all-in-one unified communications solution. Innovative, reliable and scalable, Zultys IP phone systems integrate voice, video, data and mobility in a single premise based appliance or in the cloud - to optimize collaboration for businesses of all sizes.

Zultys delivers a powerful, feature-rich communications system that is easy-to-use, deploy and maintain. Zultys is headquartered in Silicon Valley with offices around the world.
